Question 1. Develop the ProductList screen

ProductList.tsx X

src > pages > ProductList.tsx > ProductList

```
6 export default function ProductList() {
7   const [data, setData] = useState<ProductType[]>([]);
8   const filePath = 'https://dummyjson.com/products/';
9
10  useEffect(() => {
11    fetch(filePath)
12      .then(response => {
13        if (!response.ok) {
14          throw new Error('Network response was not ok');
15        }
16        return response.json();
17      })
18      .then(d => {
19        console.log(d);
20        setData(d.products);
21      })
22      .catch(error => {
23        console.error('Error fetching data:', error);
24      });
25  }, []);
26
27  const handleDelete = (id: number) => {
28    fetch(`https://dummyjson.com/products/${id}`, {
29      method: 'DELETE',
30    })
31      .then(response => {
32        if (!response.ok) {
33          throw new Error('Network response was not ok');
34        }
35        return response.json();
36      })
37      .then(() => setData(prev => prev.filter(p => p.id !== id)))
38      .catch(error => {
39        console.error('Error deleting product:', error);
40      });
41  };
42
43  return (
44    <ScrollView>
45      <Text className="text-3xl font-bold text-gray-800 px-4 pt-8 pb-2">
46        Product list
47      </Text>
48      {data.map(item => (
49        <Product
50          key={item.id}
51          props={item}
52          handleDelete={() => handleDelete(item.id)}
53        />
54      ))}
55    </ScrollView>
56  );
57}
```

Question 2. Develop the “Add a Product” screen

The image displays a development environment with a code editor on the left and a mobile app preview on the right.

Code Editor (Left): Shows the `AddPage.tsx` file. The code defines an `export default function AddPage() { ... }` component. Inside, there's a `const handleSubmit = () => { ... }` function that uses `fetch` to send a POST request to `https://dummyjson.com/products/add` with product details like title, description, price, discountPercentage, rating, stock, brand, category, and images. It also includes a `return` statement with a `<ScrollView>` containing a title text, a form field for the title, and another form field for the description.

Mobile App Preview (Right): Shows a smartphone screen with the app's UI. The title is "Add a Product". The form fields are filled with the following data: Title: "Essence Mascara Lash Princess", Description: "ratic lashes with this long-lasting and cruelty-free formula.", Price: "9.99", Discount Percentage: "10.48", Rating: "2.56", Stock: "99", Brand: "Essence", Category: "beauty", and Images: "1-images/beauty/essence-mascara-lash-princess/1.webp". A blue "SUBMIT" button is at the bottom of the form. The bottom navigation bar has icons for Products, Add, Search, and Detail.

Question 3. Develop the Search products screen

ProductList.tsx

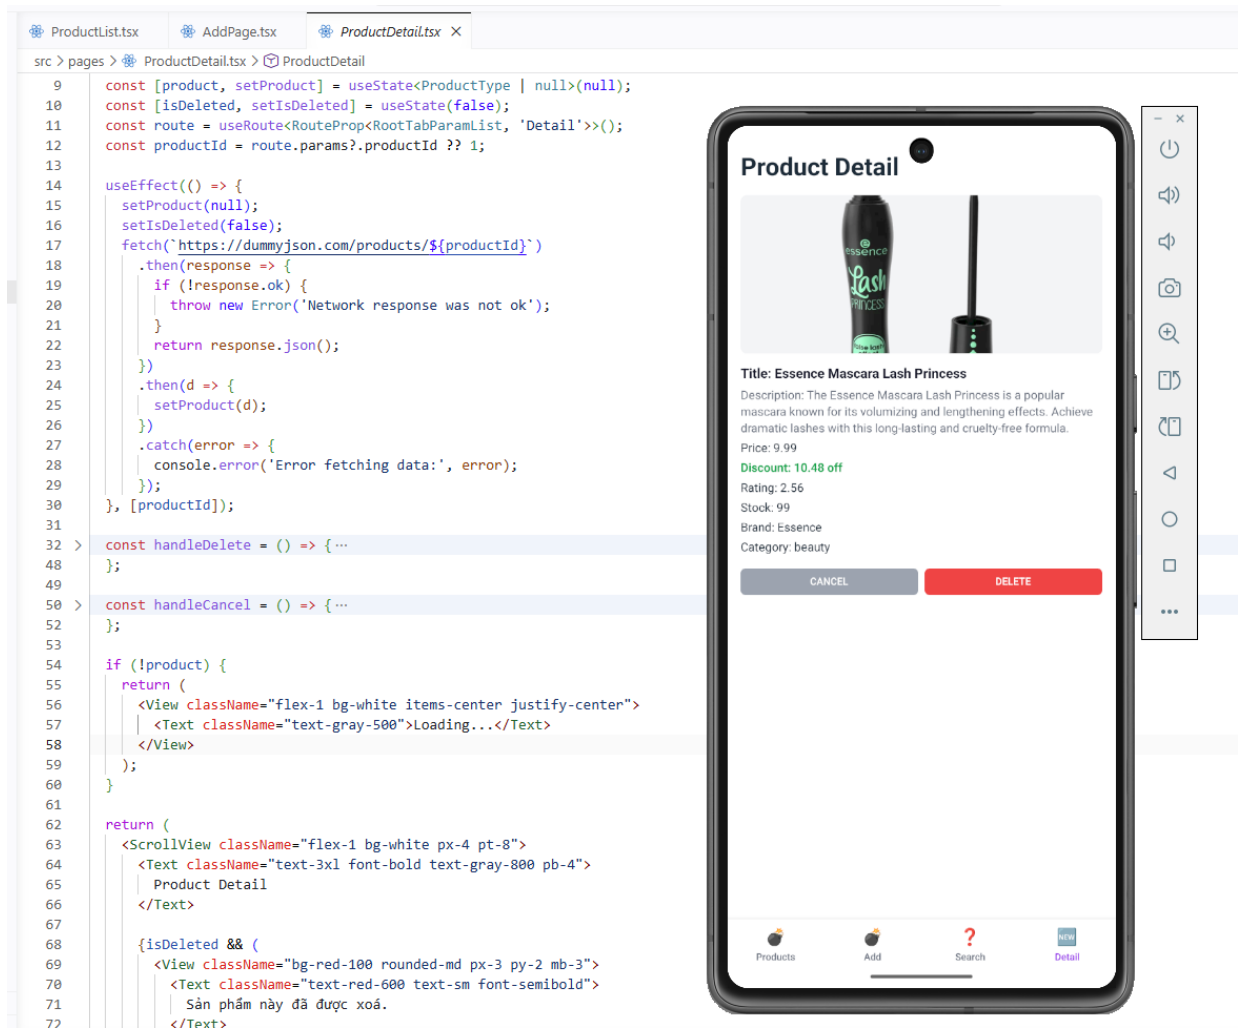

AddPage.tsx

SearchProduct.tsx X

src > pages > SearchProduct.tsx > SearchProduct

```
27
28 const searchProduct = () => {
29   let filePath = 'https://dummyjson.com/products';
30   if (value !== '') {
31     filePath = 'https://dummyjson.com/products/search?q=' + value;
32   }
33
34   fetch(filePath)
35     .then(response => {
36       if (!response.ok) {
37         throw new Error('Network response was not ok');
38       }
39       return response.json();
40     })
41     .then(d => {
42       setData(d.products);
43     })
44     .catch(error => {
45       console.error('Error fetching data:', error);
46     });
47 };
48
49 return (
50   <View className="flex-1 bg-white px-4 pt-4">
51     <Text className="text-lg font-bold text-gray-800 mb-2">
52       Search Products
53     </Text>
54
55     <TextInput
56       className="border border-gray-300 rounded-lg px-3 py-2 mb-3 text-gray-700 bg-white"
57       placeholder="Enter keyword..."
58       placeholderTextColor="#9ca3af"
59       value={value}
60       onChangeText={set_value}
61     />
62
63     <Pressable
64       onPress={searchProduct}
65       className="bg-blue-500 rounded-lg py-3 items-center mb-4 active:bg-blue-600"
66     >
67       <Text className="text-white font-bold">SEARCH</Text>
68     </Pressable>
69
70     <FlatList
71       data={data}
72       keyExtractor={item => item.id.toString()}
73       renderItem={({ item }) => (
74         <Product
```

Question 4. Develop the Detail screen

Question 5. Develop Navigation
